PROJECTS

Todos Application (ownthetodo.ccbp.tech)

A task management solution, designed to make life easier.

- Streamlined task management through a combination of HTML, CSS, and Bootstrap for an intuitive interface.
- Seamless CRUD operations through JavaScript event listeners and dynamic UI updates.
- Secure task persistence with local storage methods, ensuring that your tasks are always available.

Technologies used: HTML, CSS, JS, Bootstrap

Food Munch (f00dweb.ccbp.tech)

A responsive website that lets you browse through a wide range of food items with ease.

- Built with a mobile-first approach, this website features HTML structure elements and Bootstrap components to ensure seamless navigation.
- Get a clear view of the food items with product videos, available at your fingertips.

Technologies used: HTML, CSS, Bootstrap

Wikipedia Search Application (wikiweb.ccbp.tech)

A custom wikipedia search application that provides a simplified and intuitive way for users to access and view relevant information. With the ability to easily search for and view curated results, users can dive deeper into their interests with just a click.

- Streamlined search results with HTML list elements, styled for a modern and user-friendly interface using CSS, Bootstrap and responsive design.
- Effortlessly access information with asynchronous fetch GET HTTP API calls and the option to open the desired result in a new tab for further exploration.

Technologies used: HTML, CSS, JS, REST API Calls, Bootstrap

Java ChatBot (<https://github.com/117ABHISHEK/Java-Chatbot.git>)

The Java Chatbot is an AI-powered conversational application built using Java, featuring a seamless and interactive chat experience. It integrates with an AI model via API to generate intelligent responses dynamically. Designed with a dark-themed UI in NetBeans, it ensures a modern and user-friendly interface, where user messages appear on the right and bot responses on the left for a natural flow. This project showcases expertise in Java GUI development, API integration, and AI-driven interaction, making it an excellent addition to real-world AI applications.
